

PHONT

As diverse as language itself.

Data Scientist Intern (m/w/d)

Hello, we're Phont, an ambitious startup based in Frankfurt, and we're on a mission to revolutionize the world of subtitles. If you're an upcoming data scientist, AI enthusiast, or a student from fields like Computer Science, AI, Data Science, and keen to make an impact while learning, this is your calling.

What We're Looking For:

- **Is Graduating:** Pursuing or recently completed a bachelor's degree in Computer Science, AI, Data Science, or a related field.
- **Knows Python:** Demonstrates a basic understanding of Python and an interest in learning more. Familiarity with R would be a bonus.
- **Keen on AI:** Shows interest in AI, machine learning, deep learning, and their potential applications.
- **ML & LLM:** Has some exposure or a keen interest in ML frameworks and tools, preferably including LLMs.
- **Web Development:** Exhibits interest in web development, with an eagerness to delve into React or other frameworks.
- **Quick Thinker:** Showcases strong analytical skills and proactiveness in a dynamic setting.
- **Wants to be part of a Team:** Thrives in a fast-paced learning environment and enjoys being a part of a young and dynamic team.

If you're enthusiastic about embarking on this journey with us, we're eager to hear from you. Send your resume and a simple cover letter to hello@phont.ai, and join our mission: To create subtitles as diverse as language itself.

Warm regards, The Phont Team

What You'll Do:

- **Collaborate on AI Projects:** Work in tandem with our data science team to develop AI systems and software applications, enhancing our groundbreaking subtitle experience.
- **Hands-on ML and NLP Experience:** Engage with tasks involving NLP, Speech-Emotion Recognition, and try your hand at creating AI-generated emotional fonts. With guidance and mentorship, you'll also have opportunities to bring your unique ideas to the forefront.
- **Learning and Growth:** Delve into a role brimming with learning opportunities, exposing you to the practical intricacies and solutions in the vast realm of AI and data science.

What We Bring to the Table:

- **Growth Opportunity:** Explore potential avenues to more permanent positions within Phont, contingent upon mutual growth and fit during the internship phase.
- **Open Culture:** We hold every idea in high regard. Our culture revolves around learning from each member, irrespective of their role.
- **Flexible Environment:** Relish flexible working hours and a workspace on the Goethe University campus, perfectly balancing work, collaboration, and leisure.
- **Networking:** Dive into the expansive Hessian startup milieu and foster invaluable professional connections.

PHONT

As diverse as language itself.

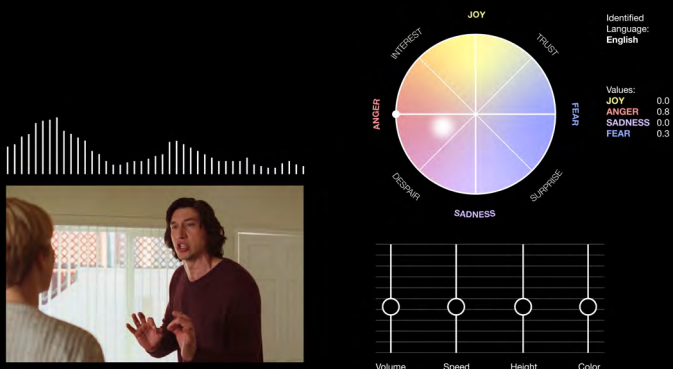

The next big UX innovation

Subtitles are the new standard. Both in streaming and on social media, more and more videos are being watched with subtitles. But subtitles only show what is spoken and not how it is spoken. We at Phont have set ourselves the goal of finally doing something about boring and non-inclusive subtitles and making them as diverse as language itself.

Technology

Using AI-powered emotion recognition algorithms, we detect linguistic features such as emotion in spoken language, and visualise these features through AI-generated fonts based on empirically developed type design. Customers can access the world's first audible subtitles through an API and easily integrate it into their offerings such as streaming, social media, or other digital platforms.

Impact

Imagine you want to watch a comedy reel on social media on your way to work in a noisy subway. Or imagine that you are one of the 2 billion or so hearing impaired people in the world. With Phont, you can have a more immersive but also more inclusive media experience. By integrating Phont and showing they value inclusion, immersion and speech diversity, companies reach new audiences while proving their values. Our vision is to establish a new standard in the media industry that will have a worldwide impact.

»Equal access to all levels of education.«

»Empower the social inclusion of all.«

»Inclusive public spaces.«

Team

We are a young startup and a diverse team with professional backgrounds in type design, data science, business administration and market research. Since July 2023 we are actively working together in Bockenheim, Frankfurt am Main, to realise our vision:

To make subtitles as diverse as language itself.
