

PHONT

As diverse as language itself.

Data Scientist (m/w/d)

Hello, we're Phont, a startup based in Frankfurt, and we're determined to revolutionize subtitles. We're seeking a data scientist with a passion for AI, ideally you are enrolled or hold a degree in Computer Science or Artificial Intelligence. Join our team and contribute significantly to our EXIST application.

At Phont we offer you an opportunity to be part of an exciting journey. Your role gives you the opportunity to make a significant impact on our vision to revolutionize subtitling and be part of our EXIST application.

What You'll Do:

- Lead the development of A.I. systems and software applications, while creating a revolutionary subtitle experience.
- Collaborate closely with our diverse team, pioneering innovative algorithms for visually representing language features. Dive into NLP, Speech-Emotion Recognition, and create AI-generated emotional fonts.
- Play a vital role in our EXIST application, improving our prototype to showcase the technological innovation behind Phont.
- Provide strategic direction and share your expertise in AI development within our dynamic startup setting.

If you're ready to take on a leading role, embrace a learning-oriented mindset, and tackle challenges independently, we can't wait to hear from you. Send your resume and a simple cover letter to hello@phont.ai, and join our mission: To create subtitles as diverse as language itself.

Warm regards, The Phont Team

We're Looking for someone who:

- Ideally you are enrolled or hold a degree in Computer Science, AI or a related field.
- Has a deep passion for AI development and machine learning, with a proven track record.
- Possesses excellent analytical skills and thrives in a structured environment.
- Expresses a genuine interest in actively engaging with the Hessian startup scene and championing our EXIST application.
- Is ready to learn quickly and enjoys being part of a young and dynamic team.

What We Bring to the Table:

- The opportunity to lead and shape cutting-edge AI technology in language representation.
- The chance to influence and contribute to the success of a growing startup, with potential for equity.
- A welcoming working environment where every idea is valued, as well as the team aspect.
- Flexible working hours and a workspace conveniently located on the Goethe University campus with some occasional table tennis breaks.
- A flat hierarchy and a culture that promotes openness and appreciation.

PHONT

As diverse as language itself.

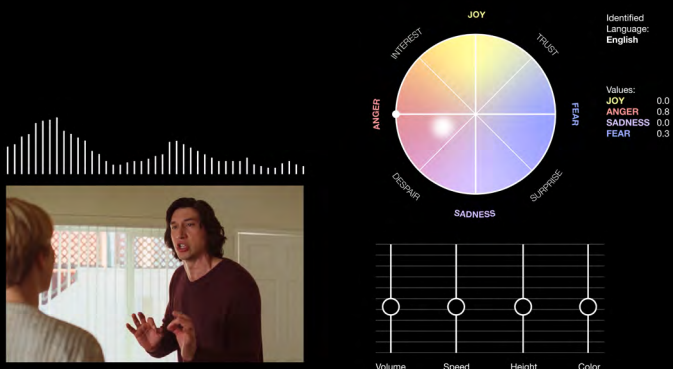

The next big UX innovation

Subtitles are the new standard. Both in streaming and on social media, more and more videos are being watched with subtitles. But subtitles only show what is spoken and not how it is spoken. We at Phont have set ourselves the goal of finally doing something about boring and non-inclusive subtitles and making them as diverse as language itself.

Technology

Using AI-powered emotion recognition algorithms, we detect linguistic features such as emotion in spoken language, and visualise these features through AI-generated fonts based on empirically developed type design. Customers can access the world's first audible subtitles through an API and easily integrate it into their offerings such as streaming, social media, or other digital platforms.

Impact

Imagine you want to watch a comedy reel on social media on your way to work in a noisy subway. Or imagine that you are one of the 2 billion or so hearing impaired people in the world. With Phont, you can have a more immersive but also more inclusive media experience. By integrating Phont and showing they value inclusion, immersion and speech diversity, companies reach new audiences while proving their values. Our vision is to establish a new standard in the media industry that will have a worldwide impact.

»Equal access to all levels of education.«

»Empower the social inclusion of all.«

»Inclusive public spaces.«

Team

We are a young startup and a diverse team with professional backgrounds in type design, data science, business administration and market research. Since July 2023 we are actively working together in Bockenheim, Frankfurt am Main, to realise our vision:

To make subtitles as diverse as language itself.
