

PHONT®

We bring subtitles to life.

React Developer Intern m|f|d

Hello, we're PHONT, an innovative startup based in Frankfurt. Our vision is to bring subtitles to life and thus reimagine a tool that hasn't been changed for a hundred years. We're doing this by integrating emotional nuances into the subtitle itself through combining AI and design.

We are currently seeking a React Developer Intern who is passionate about frontend development and eager to contribute to our product vision. This internship is ideal for students in their final year or graduates, with a strong potential for transitioning into a full-time position after three months.

What You'll Do:

- Collaborate with our team to develop and design front-end features for our platform.
- Implement native modules and animations that bring our vision to life.
- Integrate APIs and explore new development opportunities to enhance user experience.

We're Looking for:

- Experience with JavaScript frameworks, particularly React.js
- Familiarity with HTML/CSS.
- Knowledge of version control tools (e.g., Git) and agile development processes.
- A keen eye for design and familiarity with tools like Figma, XD or Illustrator
- A learning-oriented mindset
- The ability to both coordinate their work with others and being able to independently tackle challenges

Nice to have:

- Experience with Node.js, Firebase, Azure, or other backend tools.
- Experience with processing and rendering audio and video files
- Basic knowledge for the implementation of code-based animations
- You would like to join us in the office once in a while

What We Bring to the Table:

- Be part of developing a new technology in a dynamic startup environment.
- Learn and grow through challenging tasks with direct support from our team.
- Opportunity to transition to a full-time role after the internship.
- Flat hierarchies and a friendly, inclusive work culture.
- Flexible working hours and a creative workspace conveniently located in Frankfurt.

At PHONT, we're combining advanced AI such as emotion recognition and design methods to transform how people interact with subtitles. From streaming services to social media platforms, our vision is to bring subtitles to life. If you're excited about frontend development and would like to be part of a motivated team with a clear vision, please send your resume with a short non-formal introduction to hello@phont.ai. We are looking forward to hearing from you!

Warm regards
The PHONT Team
